Features and Benefits

Material Management

The Material Management module of Carus Onboard manage all your stock items; food & beverage inventory, retail shop inventory, inventory for crew kitchen, laundry and consumables. The vessel module of the Material Management system handles the purchase process, deliveries, and shifting stock between onboard locations.

The head-office Material Management module manages the shifting of stock between vessels as well as centralized purchasing. The Material Management functionality enables you to track sales, inventory, purchases and other expenses, as well as predict your theoretical usage and food cost. The solution also supports contract pricing, streamlines communication with suppliers and provides accurate forecasting tools to predict future sales, product mixes and guest counts.

Our Onboard Solution!

About Carus

Carus is totally focused on the passenger shipping industry providing advanced reservations, onboard and port solutions that are constantly evolving to meet the ever-changing operational demands of our clients.

For over a decade Carus has been serving a growing client base which includes operators throughout the Baltic, mainland Europe, the United Kingdom, the United States, Africa and Australia. Carus clients cover every aspect of the passenger vessel industry and operate virtually every type of vessel proving the versatility and flexibility of our reservation and onboard solutions. The Carus systems are tried and tested solutions that provide the 24/7 reliability required of mission critical applications especially when delivered via our managed services.
