Features and Benefits

Kitchen Management

No matter how good your service or location, the quality of the food you serve and how long it takes to come will always be key talking points for customers and pivotal for return visits. The reputation of your business relies on the ability to continually maintain high standards of food production.

Our kitchen production software and hardware help maximize guest satisfaction, reduce staff costs, minimize kitchen errors and reduce food waste. With its bright graphical displays, robust reporting capabilities and quote time calculators, the Carus kitchen functionality provides better analysis, enhanced organization of items and controlled timing functionality. It also seamlessly integrates with the ePOS guest management functionality.

Our Onboard Solution!

About Carus

Carus is totally focused on the passenger shipping industry providing advanced reservations, onboard and port solutions that are constantly evolving to meet the ever-changing operational demands of our clients.

For over a decade Carus has been serving a growing client base which includes operators throughout the Baltic, mainland Europe, the United Kingdom, the United States, Africa and Australia. Carus clients cover every aspect of the passenger vessel industry and operate virtually every type of vessel proving the versatility and flexibility of our reservation and onboard solutions. The Carus systems are tried and tested solutions that provide the 24/7 reliability required of mission critical applications especially when delivered via our managed services.
